FUTUREMINDS

A FutureMinds Solution

01

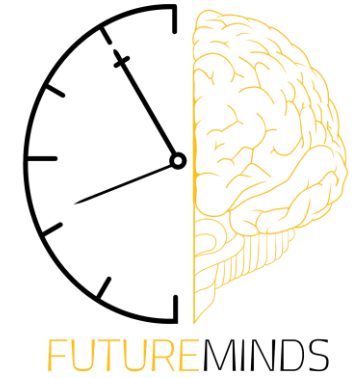

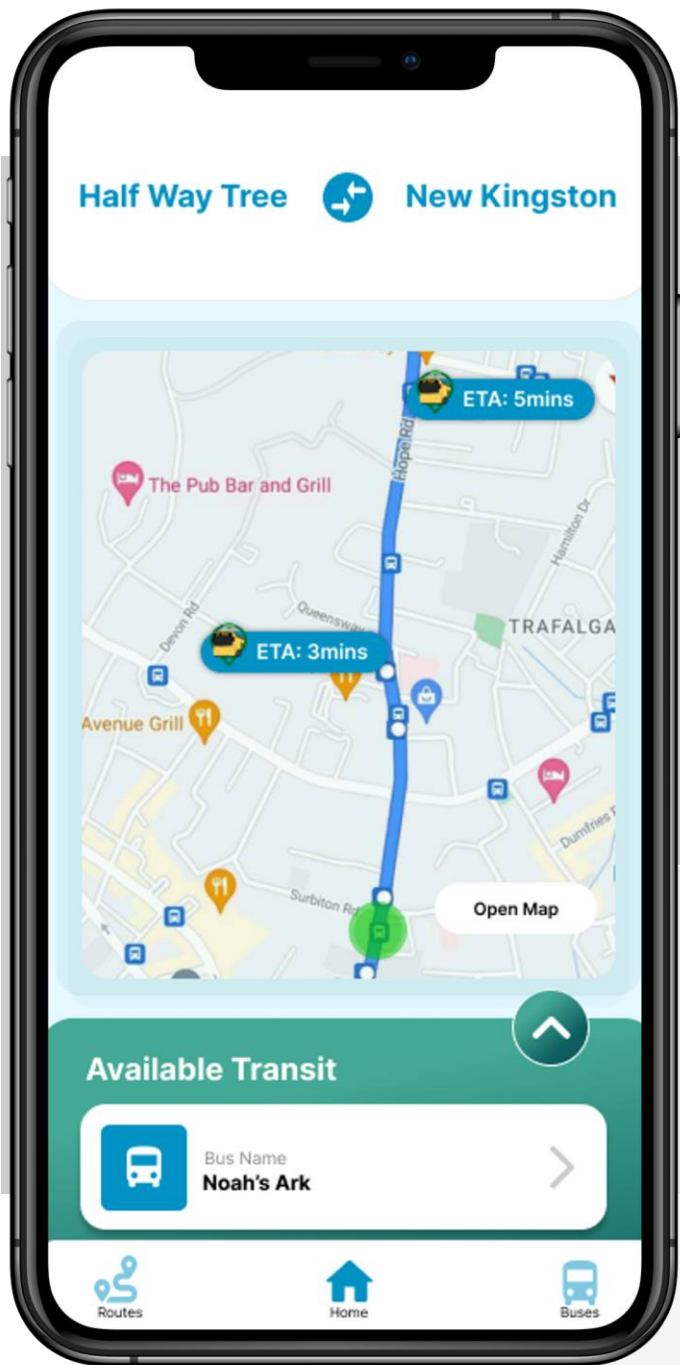

# The Problem

The current public transit system makes it impossible to plan your journey when taking public transport. This results in a loss of productivity and time across all sectors in the island.

FUTUREMINDS

# Our Solution

Providing real-time data to commuters will empower them to confidently make informed decisions of when and where public transportation is available

## Less Traffic

Reliable bus schedules will allow commuters to leave their cars at home and use public transportation

Less Traffic = Less Pollution

## Increased Productivity

Giving power to the hands of commuters will allow them to make informed decisions of their journey

By providing real time data of commute, less time is wasted waiting at bus stops

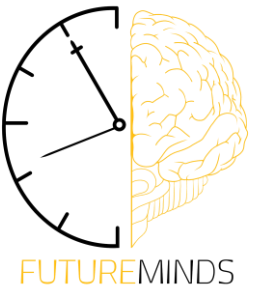

## Road Safety

As we develop a more reliable and efficient public transportation system, commuters no longer need to rely on reckless drivers

# The Target Audience

---

01

## Working Professionals

Persons who commute to and from work on a daily bases.

02

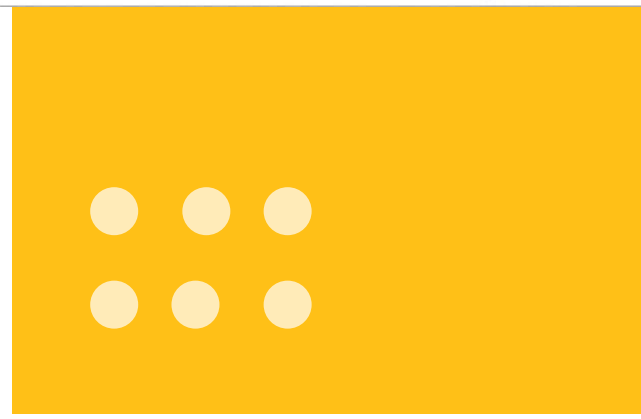

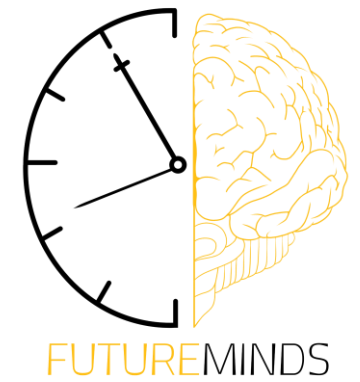

## Students

Students: commuting to and from school on a daily basis.

03

## Regular Commuters

Persons who commute that want use their time more effectively en route.
